GENERAL UTILITY/ DRAINAGE NOTES

– There is a 20ft. general utility easement across the front of each lot.

– Easements grant and convey to the telephone company, and its successors, the right to trim or remove any and all trees, structures and obstacles located on the easements or in such proximity thereof that in falling they might interfere with the operation and maintenance of said facilities. No building or other structure shall be erected, and no landfill or excavation or other change of grade shall be performed upon said easements after installation of said facilities. Be it also understood that the right of ingress and egress be granted to the users of the utility easements as required to construct, operate, maintain, and reinforce facilities within said easements.

– Electric Easement – A distance of 15 ft. on the property side of the road R/W (running parallel to the road R/W on both sides of the streets.) Also a guying easement 10 ft. wide (5 ft. on each side of property line) and 30 ft. deep (from road R/W wherever a utility pole is erected.

– All entrances providing access to State and Federal right-of-way must receive an entrance permit from the Kentucky Department of Highways. Approval of the plat does not relieve property owners of the responsibility to obtain an entrance permit, nor does it guarantee approval of an access permit even if properly applied for.

– Drainage Easements – Drainage Easements over all watercourses, drainage ways, channels, streams or sinkholes are hereby granted. Said easements are 20 feet in width, centered on each primary drain, being 10 feet on each side of said flow line or a 20-foot radius around the center of a sinkhole. The storm water easement is a non-buildable area. This does not prohibit pond or retention basin construction in the area. No building or structure may be constructed within or protrude into this non-buildable area. Designation of said easement does not imply that other areas of the property will not flood. Meade County assumes no liability for property damage because of storm water.
